CITY OF MERCED
Development Services

TO: Bicycle Advisory Commission
FROM: Bill King, Principal Planner
DATE: December 11, 2012
SUBJECT: Section 5 - 2013 Bike Plan, "Existing Bike System"

ACTION REQUIRED:

Commission Recommendation of Proposed Bike Plan section

BACKGROUND

Section 5 of the draft 2013 City of Merced Bicycle Transportation Plan describes the existing bike system, and will include the following sections:

- 2008-2013 Actual Bike Use
- Existing Bikeways
- Existing Support Facilities and Programs
- Existing Mobility Connections
- Past Bike System Expenditures

The text of the 2008 Bike Plan was updated and amended, and is presented on pages 2 to 10 of this report.

ACTION

Staff recommends that that the BAC review draft Section 5 to: 1) identify subjects needing clarification; and, 2) topics needing adjustment, and, then take action at the December 2013 meeting to either approve or to recommend changes.

Section 5: Existing Bike System

2008-2013 Actual Bike Use

From the U.S. Census 2006-2010 American Community Survey, there are an estimated 373 bicycle commuters in Merced, or 1.3% of the work force (these figures do not include students commuting to school). The implementation of this plan will result in a comprehensive, continuous, and well-maintained bikeway network, maximizing bicycling benefits to the area's cycling and non-cycling public. Therefore, the implementation of this plan will raise the percentage of bicycle commuters (employees and students) to 5%. This increase will be supplemented by a ridership growth of other bicyclists (recreational, avid, short-trippers, etc.).

Existing Bikeways

The City of Merced has the most comprehensive bikeway system in the County. The Merced urbanized area has an extensive system of bicycle paths, with its bikeway system consisting of facilities in each of the three classifications. There are currently 18 miles of Class I paths, 24 miles of Class II lanes, and 11 miles of Class III routes completed. The Existing Bikeway System is identified in Figures 5.1a and 5.1b

Bear Creek, Black Rascal Creek, Cottonwood Creek, and Fahrens Creek traverse through the City. Much of the area alongside the creeks has been developed as linear parks, with bike paths leading to residential and recreational areas, schools, and some commercial centers. Such environments are particularly ideal for the commuting and recreational aspects of bicycling. Class I bicycle paths are located along Bear Creek, Black Rascal Creek, Cottonwood Creek, and Fahrens Creek, with an intent in keeping the creek side environments as natural as possible, while still being user-friendly.

The Bear Creek Path was constructed in the mid 1970's in three phases originating from the western end near Snelling Highway (Highway 59). About 2-¼ miles of bike path up to Mercy Hospital and underpasses at G and M Streets were built during Phase I. Phase II extended the project up to the McKee Road bridge (city limits) and County participation extended the bike path beyond City Limits. Phase II constructed three miles of bike path with about 50 percent having completely separate paths for east and west directions. Phase III is 1-¾ miles. The Bear Creek path is the most used path by many commuters as it travels in an east/west direction providing direct access to Downtown and shopping areas, Applegate Park, hospitals and medical clinics, and provides further connections with Class II bikeways on arterial and collector streets.

The Black Rascal path was constructed in the late 1970's originating at Snelling Highway (Highway 59) and extends east towards McKee Road. This section, built in two phases, is about 2-5/8 miles. The bike path is eight feet wide, with a three-inch thick asphalt layer and parallels the creek. Phase III, an extension from McKee Road to Lake Road that would have completely connected the Black Rascal Class I bike path system with the County's UC Merced/Lake Road Class I path, is now partially constructed, with only a small portion

unfinished. West of G Street, the path runs along many residential areas and Merced High School, providing bikeway access to many commuters and a direct route to schools and medical offices. Further west, Black Rascal Creek path eventually is joined by the Fahrens Creek system.

With Merced's housing market boom beginning in approximately 2001 and ending in 2007, residential and commercial land developers were required to design and install both Class I and II bikeways. As a direct result of development occuring between 2001 and 2007 and a dedication to implementing the Bike Plan, the City of Merced has experienced a large increase in both the number and quality of its Class I and II bikeways, particularly connections to its newest paths, the Cottonwood and Fahrens Creek path systems.

The Cottonwood Creek Class I bike path, in its long-range conceptual form, would follow the natural course of the creek's path from its split at the fork of Fahrens Creek easterly up to the UC Campus connection at Lake Road. Currently, the completed section of this path runs easterly from Fahrens Creek to Gardner Road,. The path provides easy access from residences to shopping, schools, medical and other offices, and a hospital.

The Fahrens Creek Class I bike path system is approximately halfway completed, with finished sections running northward from the merging point of Black Rascal Creek and Fahrens Creek just east of Highway 59 at Buena Vista to the area just north of Cardella Road. The remaining uninstalled section will continue the path northward to Bellevue Road, and then will continue in a northeast trend along Fahrens Creek to G Street. The remaining uninstalled portions north of Bellevue Road would be built as land is developed in those areas, which likely will not occur for many years to come.

As aforementioned, another bicycle Class I path runs northward alongside Lake Road between Yosemite Avenue and Lake Yosemite, outside of the city limits. This path was recently upgraded by the County and will most likely connect with both the Cottonwood and Black Rascal Creek bike path systems to the south, at some future point in time.

Existing Class II bicycle lanes include many of the arterial streets within the City, including major sections of G Street, M Street, Yosemite Avenue, and McKee Road. Several other streets have shorter sections with designated bicycle lanes. These include R Street, V Street, West Avenue, Main Street, 18th Street, and 21st Street. Like the Class I path system discussed above, many sections of Class II lanes have been added as more parts of the City have been developed, further increasing and improving the City's overall bikeway connectivity.

Class III bicycle routes are located on sections of additional collectors and arterials including V Street, 26th Street, Glen Avenue, and Childs Avenue. The City of Merced has designated bicycle routes wherever bikeway connections are necessary, but no opportunity for lanes or paths exist. While bike routes are not the ideal, bike route signs remind drivers and cyclists to share the road.

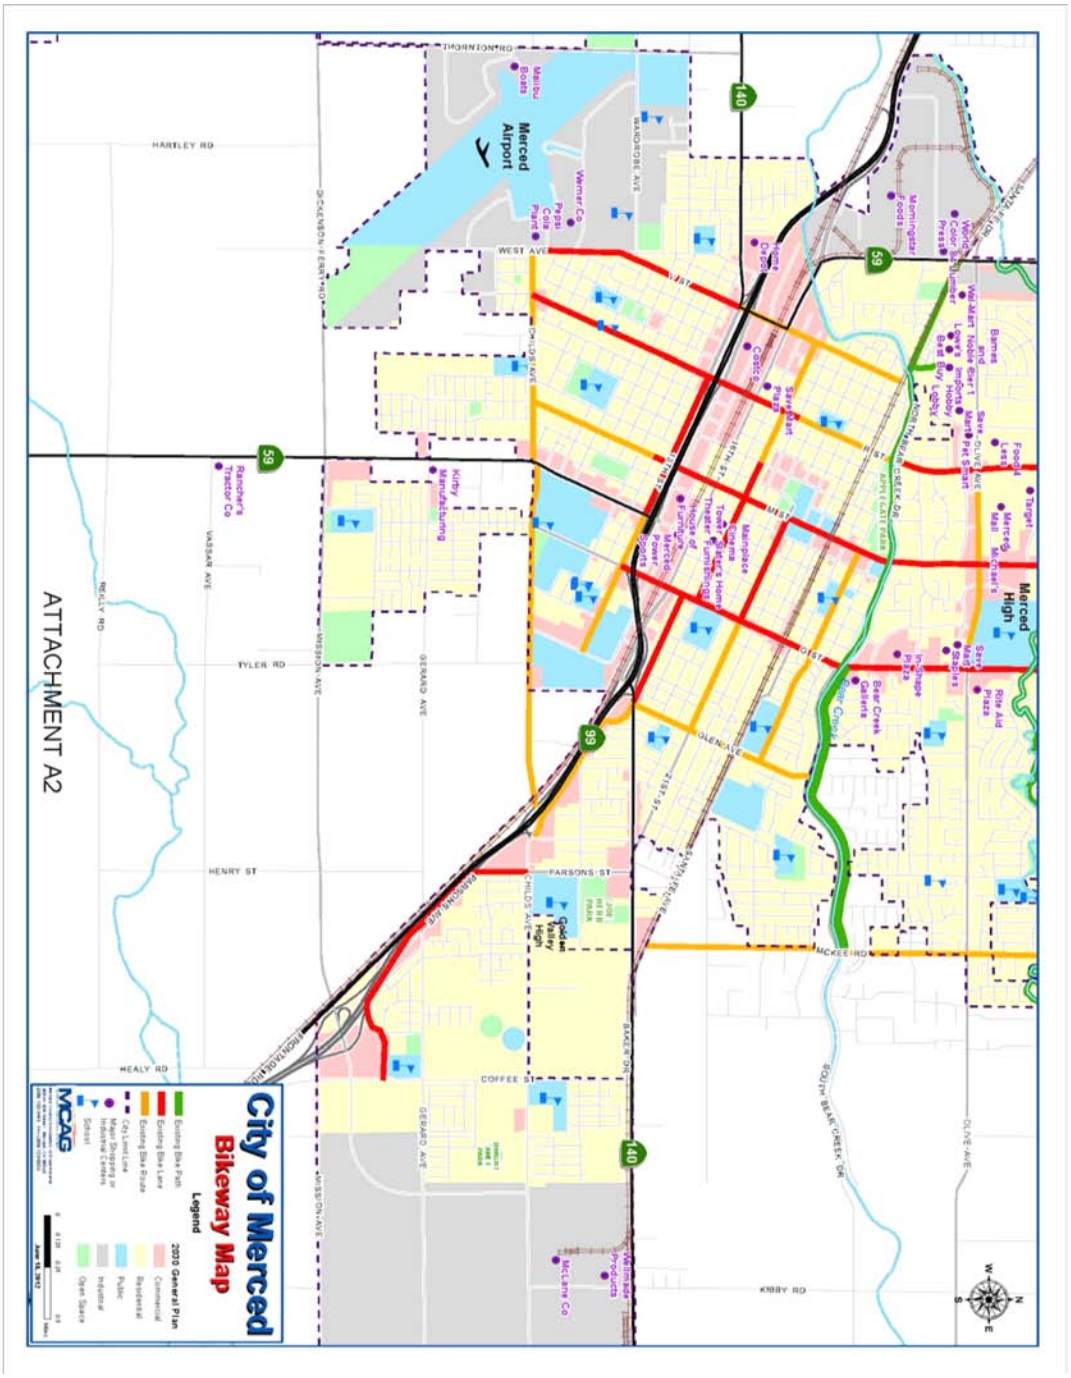
ATTACHMENT A1

Figures 5.1b: Existing Bike Facilities (South Merced)



Existing Support Facilities and Programs

Parking

Bicycle racks are the most common types of bicycle parking facility seen in Merced. Due to increasing popularity in bicycle commuting, bike racks are located at many sites throughout Merced including; various locations in the downtown area, the Merced Mall, all of the schools, Mercy Hospital, and several large employers. Bicycle lockers are available at the Merced Transportation Center.

In (date), a survey of existing bicycle racks and number of spaces was performed in the City of Merced. The bike parking survey is filed at the City of Merced Planning Division. The survey results are summarized below:

Bicycle Parking Facilities		
	Bike Racks	**Bike Spaces**
Retail	57	168
Office Buildings	14	28
Government Buildings	9	10
Schools	96	1509
Libraries	4	24
Transit	118	197
Recreation Centers	5	27
Totals	**303**	**1,963**

To be consistent with the questions posed by the League of American Bicyclists, and to expand the City's knowledge of bike parking, the following bike-parking categories should be utilized in the next round of bike parking surveys:

- Schools
- Libraries
- Transit Stations
- Transit Vehicles (internal and external)
- Parks and Recreation Centers
- Government Buildings
- Office Buildings
- Shops/Retail
- Public Housing

Showers

(Language to be provided at a later date)

Bike Lockers / Long-Term Parking

Having safe, long-term bicycle security, such as the bicycle shelters at Mercy Hospital, the Transportation Center, and the Amtrak station may encourage bicyclists to use their bikes as their initial transportation to one of these storage areas before continuing their trip by train or bus. This long-term parking will be especially helpful for bicyclists wanting to take Greyhound, since Greyhound will not carry bikes.

Safety and Education Programs

(Language to be provided at a later date)

Existing Mobility Connections

Mobility connections encourage bicycling. Figures 5.2a and 5.2b show the existing bikeway system relative to: 1) the Merced County bus service; 2) Cat Tracks; 3) the Amtrak station; and, 4) the Merced Transportation Center, which is the hub location in Merced for the Merced County bus service, Yosemite Area Regional Transportation System (YARTS), and Greyhound Bus.

Merced County Transit Buses

The Merced County transit buses are equipped with bicycle racks; these features enhance the bicyclist's range of travel. For locations that the Merced County transit system does not service directly (slightly off the fixed-route system, i.e. residences), bicyclists could ride to those places from locations along the fixed-route bus transit system.

Cat Tracks

The Merced County bus service is run by the Transit Joint Powers Authority for Merced County. Cat Tracks is run and operated by UC Merced. The Cat Tracks buses are also equipped with bicycle racks.

Amtrak and on YARTS

Bicyclists could take along their bikes on Amtrak and on YARTS. Bikes are permissible on certain Amtrak trains as long as the passenger's bike is no more than 50 pounds (http://www.amtrak.com/bring-your-bicycle-onboard). A passenger can take a bike on a YARTS bus as long as space is available in the bus' undercarriage luggage compartment. Greyhound will not carry bikes.
